

YOUR SKIN IS REBORN WITH NEW LIGHT.

PHOTOREJUVENATION

Profound effect on fibroblasts with the production of new collagen and elastin at the dermis level.

SENSITIVE SKIN

Creates a selective thermal stimulus that performs discernible **re-epithelialization** of the blood vessel walls upon reaching them.

SKIN SPOTS

Significant reduction of the skin hyperchromias (hypermelanosis) caused by considerable increase of production of melanin by melanocytes.

ACNE AND GREASY SKIN

Alleviates the inflammation process of the sebaceous gland, reducing the excessive production of sebum.

TECHNICAL CHARACTERISTICS

INTENSE PULSED LIGHT EMITTER

DISPLAY: 8" LCD touch screen

DOUBLE EMISSION SYSTEM:

- single spot frequency at 1 Hz
 - multi-frequency system: frequency from 1 Hz to 5 Hz TSF (Top Speed Frequency)
- HIGH DURABILITY XENON LAMP** - 250,000 spots
- EPILATION FILTERS:** 3 filters (610 nm, 640 nm, 690 nm), plus Double-Edged Light Emission Filter at 690-950 nm
- MAXIMUM ENERGY DENSITY:** 26 J/cm²
- PULSE DURATION:** 2 ms - 20 ms
- SPOT AREA:** 50 mm X 15 mm = 7,5 cm²
- COOLING:** with water using the double cooling system (Peltier cells and copper radiators)
