

THE "DAY LIFTING".

KRF carries out a process of true "Skin Rejuvenation", stimulating the functional activity of the fibroblasts and helping to improve the tissue elasticity and permeability.

IT GETS RID OF WATER RETENTION, IMPROVES THE CONDITIONS OF MICROCIRCULATION AND REOXYGENATION OF THE TISSUES.

- Lifts up the facial profile;
- Smooths wrinkles;
- Performs significant drainage;
- Intervenes on tissue reoxygenation.

KRF is the capacitive Radiofrequency with **fractional emission** and **Ceramic transducers**.

KRF CARRIES OUT THREE FUNDAMENTAL INTERACTIONS WITH THE DERMAL STRUCTURES:

- Epidermis: strong increase in cellular turnover
- Dermis: stimulation of fibroblasts with the production of collagen and elastin
- Hypodermis: stimulates heat-sensitive receptors contributing to reduce the localized adiposity

REJUVENATES, TIGHTENS AND REMODELS.

TECHNICAL CHARACTERISTICS

- DISPLAY: 7" TFT 800x480 touch screen
- OPERATION METHOD: Continuous/Fractional
- COOLING: Forced ventilation
- SMALL BIPOLAR FACE HANDPIECE Ø mm 5X2
- LARGE BIPOLAR FACE HANDPIECE Ø mm 32
- MONO AND BIPOLAR BODY HANDPIECE: 32 cm²
- STEEL PLATE: 150x200 mm
